p. 555-558.

DESCRIPTORS: Histology, Morphology, *Cells
(Biology), *Microsomes, *Electron microscopy.

Based on a discussion of the data from the literature
and original observations of the ultrafine organization
of various unicellular and multicellular organisms, it
is concluded that the character and dimensions of the
paired mitochondrial membranes do not support
Sjöstrand's views that the interval between them is
occupied by a lipid layer. Each of the membranes
